Professional Experience

Live Streaming & Broadcast Engineer, Meta | *Menlo Park, CA* | 01/22 - current
Responsible for overseeing live streaming of high-profile, Tier-0/1 external-facing events with the audience reach surpassing multi-million viewership.
• Assessing event request tiers, managing ticket creation, and escalating service requests. Integral member of the Streaming & Broadcasting Services team, a top-tier division within Meta's The Production Group in Enterprise Services. Compiling incident reports, streaming metrics, and comprehensive service utilization reports for the SBS service owner.
• Leveraging high-power cloud-based transcoders along with both software and hardware-based encoders.

Video Encoding Infra Engineer, Event Compression Group | *San Mateo, CA* | 10/20 - 1/22
Led the design and execution of enterprise-grade live and pre-recorded event streaming, taking full ownership from inception to successful broadcast.
• Configuring multiple hardware and software encoders for optimal performance.
• Orchestrated network setups and oversaw CDN management to guarantee seamless delivery worldwide.

Streaming & Broadcast Engineer, Everything Audio Visual | *San Francisco, CA* | 10/19-08/22
Being the person in charge of streaming the virtual events. Utilizing Zoom, NDI, Vmix, switchers, setting up hardware & software encoders, and playout devices.
• Directed and executed streaming operations for virtual events, guaranteeing flawless delivery and exceptional production quality.

Audio Video Technician, Everything Audio Visual | *San Francisco, CA* | 05/18 - 09/19
Key role in the setup and operation of top-tier audio and video equipment for events at premier venues across the San Francisco Bay Area
• Collaborated closely within a dynamic team to execute setup plans, effectively communicating with management to achieve objectives
